### DETAILED ACTION

This Office Action is in response to the Request for Reconsideration filed October 1, 2008. Currently claims 1-3, 7, 9-12, 16-18 and 20 are pending.

#### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-3, 7, 9-12, 16-18 and 20 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-7, 11-12, 15-20, and 22-23 of copending Application No. 09/892,665. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the claims to the instant application and the ‘665 application are directed to methods and systems for allowing users to access legacy systems.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Response to Arguments***

3. Applicant's arguments with respect to claims 1-3, 7, 9-12, 16-18 and 20 have been considered but are moot in view of the new ground(s) of rejection.

4. Applicant's arguments filed October 1, 2008, have been fully considered but they are not persuasive. Applicant argues, because application 09/892,665 has not been allowed, the obviousness-type double patenting rejection is premature. In response, the Examiner agrees that application 09/892,665 has not been allowed. In consideration that the application has not been allowed, the provisional obviousness-type double patenting rejection was made (see rejection above), and thus the rejection is not premature. As such, the provisional obviousness-type double patenting rejection will be maintained.
